

Welcome.
We Introduce tci to You.

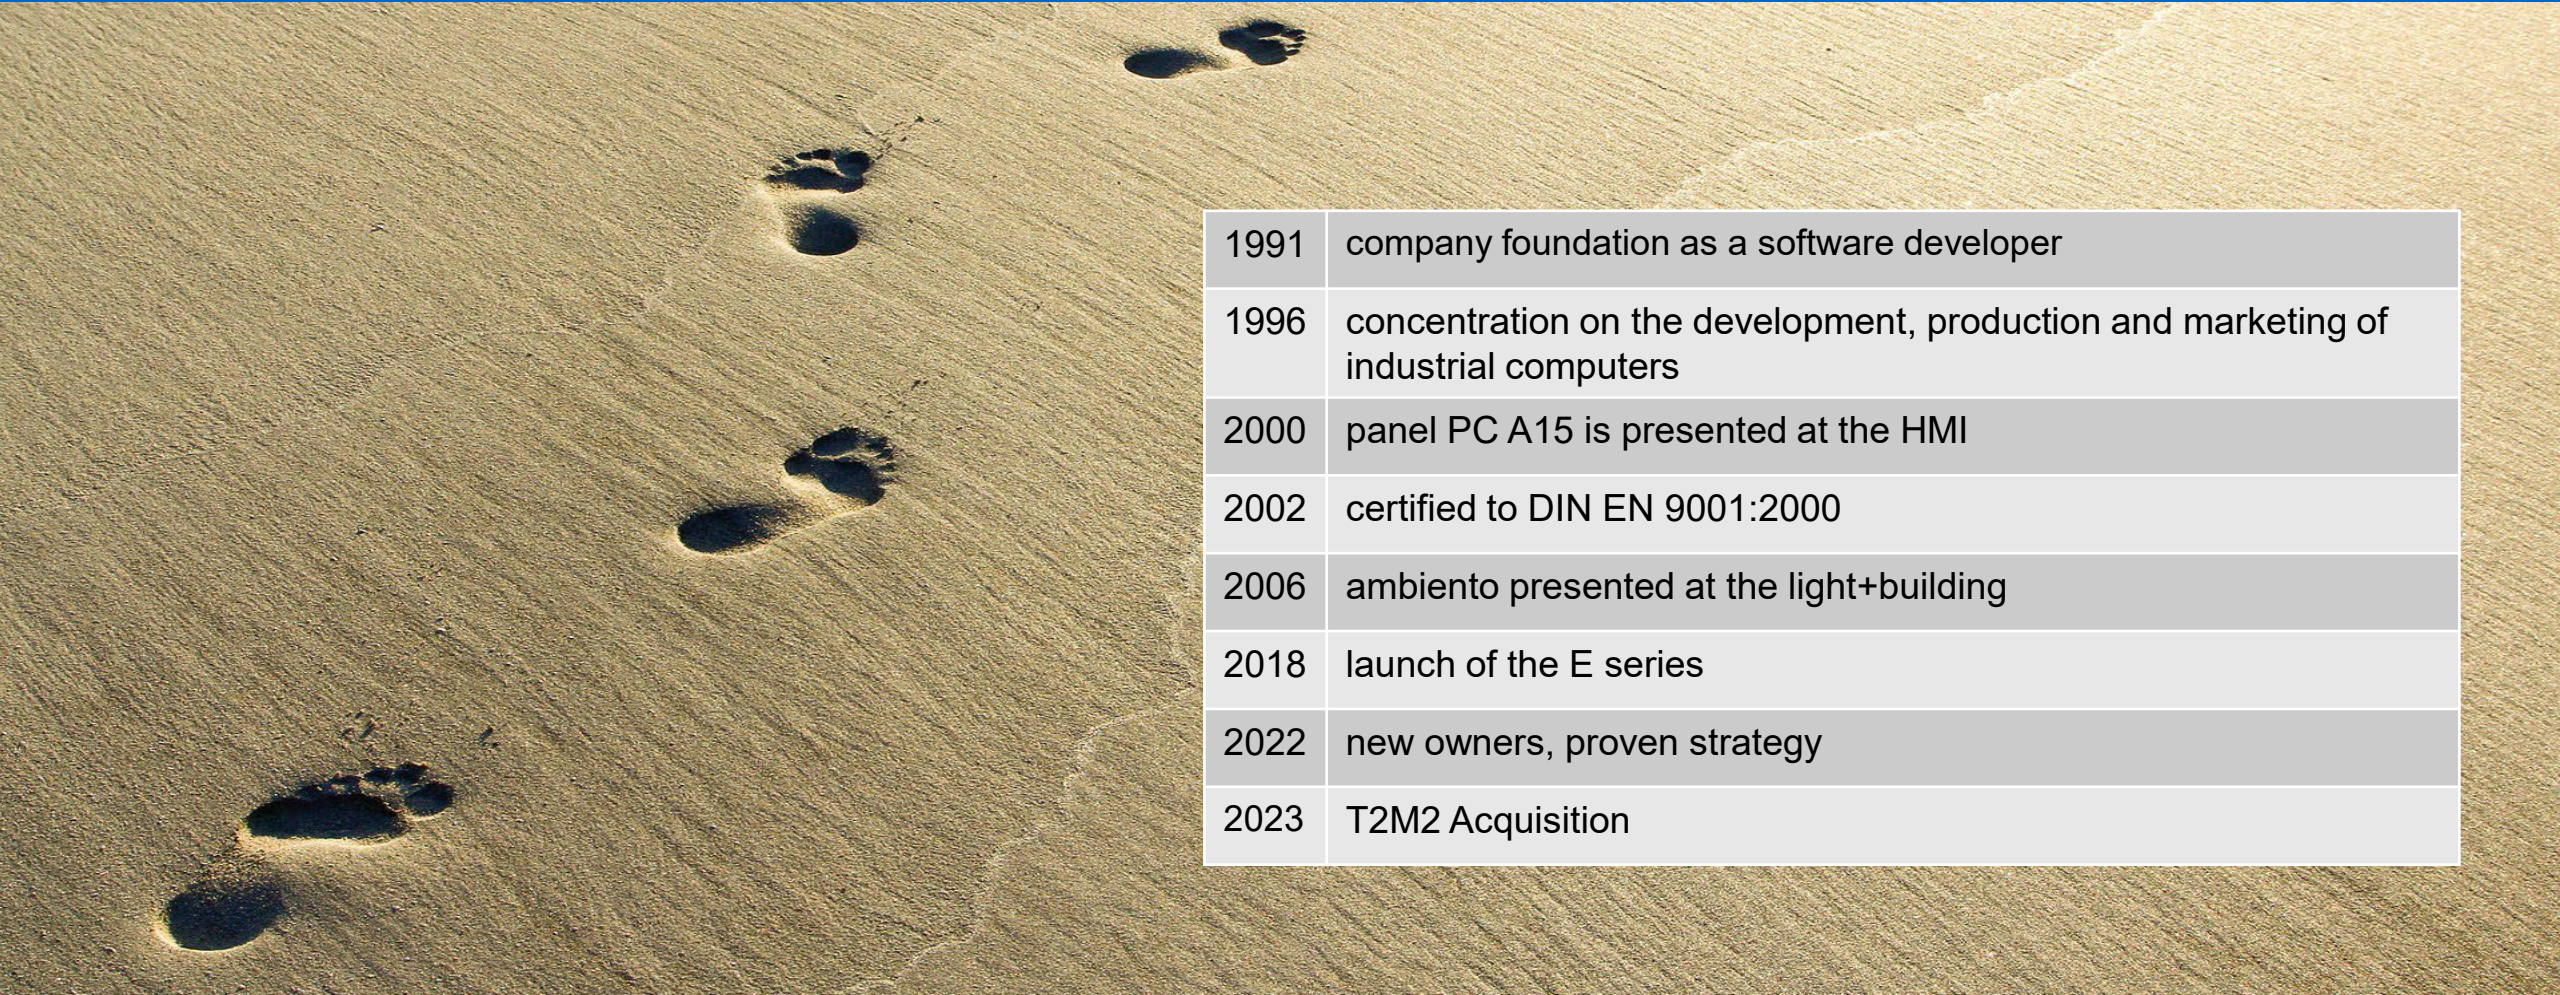

Our Business: Industrial Computer and Touch Panels for Building Automation

tci Key Data:

- 75 employees
- 2.000 m² company floor area in Rinn & Cloos Carrè
- own software/hardware development department
- production „Made in Germany“
- own support department

History

1991	company foundation as a software developer
1996	concentration on the development, production and marketing of industrial computers
2000	panel PC A15 is presented at the HMI
2002	certified to DIN EN 9001:2000
2006	ambiente presented at the light+building
2018	launch of the E series
2022	new owners, proven strategy
2023	T2M2 Acquisition

Umbrella Brand

New Owners, Proven Strategy

Managing shareholders:
Dipl.-Ing. (FH) Jens Becker and Bachelor Professional Metin Alpsoy

Our Vision

At tci, we want to create something that provides meaningful support in daily life and leaves lasting solutions. With passionate enthusiasm for technology, we design and manufacture exclusively in Germany out of conviction. We place a high focus on the development of individual, needs-oriented systems with and for our customers as a team. tci produces computers and touch panels for applications in industrial and building automation.

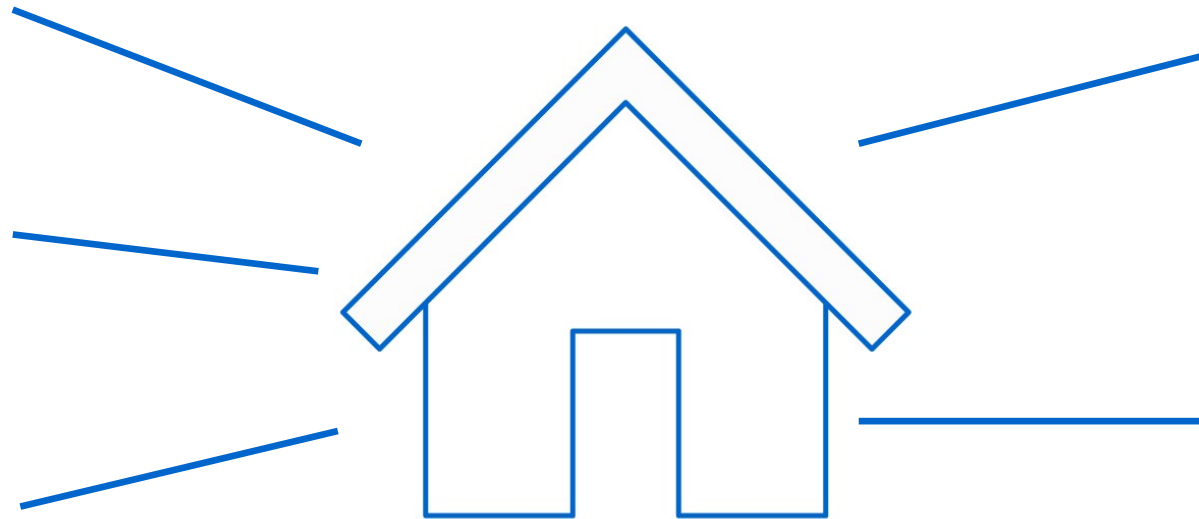

Our Strategy: Long-Term, Stable and Customized

We fulfill
customer requests
individually

Modular system
for the products

Adaptability
during the
serial production

Stable and long-term
secured
corporate finance

Experience and innovation:
We develop our own
employees (dual study
program) and recruit new
ones.
(2 local universities)

tci as Project House

Why is tci the Right Partner for You? Because...

- ... we ask the right questions and listen to you.
- ... find suitable solutions for you.
- ... or develop.
- ... are your contact persons up to delivery and beyond.

You can Rely on tci

Thanks to

- technology
- manufacturing and quality
- support
- logistics and on-time delivery
- strategy
- lifeblood

And We Have Products, Too...

Web Panels with EO/Yocto

The ideal combination of Hardware and Software for Smart buildings and Industrial Application

- Over-the-Air-Updates
- Kiosk Browser (Chrome)
- Cloud-on-Premise Solution for Your Device Management
- Optimal Cybersecurity

nexo

Touch Panel for Smart Home

- The Open Room Interface
- High-performance hardware with a controllable, lean software stack based on OpenEmbedded Yocto

luna

Touch Panel for Smart Home

- flush installation with continuous glass surface
- high performance for your application
- your smart home control center in an attractive design

Edition3 and Edition4

Touch Panel for Smart Home

- Outstanding tactile feel thanks to glass multitouch in various design variants
- Flexible mounting for seamless integration into various room concepts
- Free choice of bus system

WP-Serie

Industrial Touch Panel

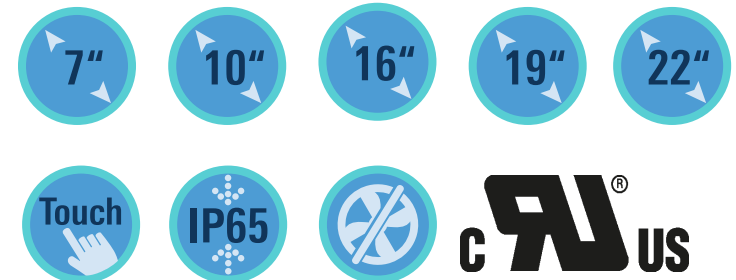

- High-performance multitouch panels with a modern glass-front design
- Robust Aluminum Flush-Mount Front
- Linux (Yocto) with "Design by Secure" for High Cybersecurity

F-Series

Industrial Touch Panel

- hardened aluminum front or stainless steel
→ rugged for extreme requirements
- The ESG cover glass reliably protects against heavy loads or collisions
- real glass front with capacitive glass touch up to IP69k/IK08

F16T

Industrial Touch Panel

- outdoor or in the production-related environment
- rugged all-round closed touch panel for mounting arm (IP65)
- optionally available with an extended temperature range (-40 up to +70°C)

F10T and F19T

Industrial Touch Panel

- Developed for the hygiene sector and the food industry
- Seamless stainless steel design, IP65, easy to clean
- Robust Glass Touch Control for Industrial Systems

Thank you

for your kind attention.

We look forward to joint projects!
